

DURA-DRIVE DRIVEWAY MIX

The Concrete Guys Inc. has been serving Northwest Indiana's ready mix concrete needs since 2007. We are a family business that opened our doors in January of 2007. Located in Merrillville, Indiana, we provide services to Lake, Porter, Jasper, and La Porte counties.

We strive to serve our community within a 75-mile radius of our headquarters. We offer

DURA-DRIVE PREMIUM CONCRETE DRIVEWAY MIX

- 6.5 bag, 4,500 PSI concrete mix design
- .45 w/c with additional midrange water reducer
- Internal sealer is added to the mix during the batching process

DURA-DRIVE BENEFITS

- Mix is hydrophobic, repelling water ingress
- Mix has higher strength, increasing density and protection against freeze/thaw damage
- Mix has higher slump, allowing for ease of placement and finishing

DURA-DRIVE PLACEMENT

- Place and finish concrete the same as regular mixes
- Joint the concrete according to the ACI 332
- Apply a curing compound meeting ASTM 309 immediately after finishing

DURA-DRIVE MAINTENANCE

- Keep driveway clear of ice and snow as recommended for all concrete
- Avoid using deicer chemicals on the surface of the driveway
- Apply a siloxane sealer to the surface every 2 years

Dura-Drive Concrete is a premium concrete mix and as such will provide additional benefits over the standard concrete mix design. Please note that Dura-Drive still requires proper placing, finishing, and curing procedures to perform to its potential and is not a protection against improper concrete practices. If you have any questions about this product or anything else concrete related please contact your The Concrete Guys Inc. representative.
